

# MINUTE FOR SAFETY

A Safety and Health Bulletin  
From Gallagher National Risk Control

COMMERCIAL LINES

September 2020

**Minute for Safety**, published by Gallagher National Risk Control, is a monthly electronic publication promoting safe workplaces for clients in all industries. Each bulletin briefly highlights important safety tips that can also be shared at your facility during team huddles. The information contained in this newsletter was obtained from sources that, to the best of the writer's knowledge, are authentic and reliable.

## Electric Tools—Grounds for Concern

Each year workers suffer shock when handling electrical tools and equipment. To protect workers against the hazards of electricity, teach them the basic facts about the causes of shock and death. One of the big problems in understanding the dangers of electrical shock is the mistaken belief that only high voltages kill. It's not the voltage that kills, but the amount of current that passes through the body. The condition and placement of the body has a lot to do with the chance of getting a shock.

Water and electricity can be a fatal combination. Damp areas and metal objects can offer good shortcuts for electricity to reach the ground. If a worker's hands are sweaty, if socks and shoes are moist or damp, if the floor is wet or if the worker is standing in a puddle of water, the moisture will allow more current to pass through the body. If work is to be done with metal objects or in damp areas, workers should recognize the hazards and take necessary precautions. These precautions include rubber gloves and boots, rubber mats, insulated tools, and rubber sheets that can be used to cover exposed metal.

### Remembering a few tips can help avoid electrical accidents.

- Treat every electric wire as if it were a live one.
- Inspect equipment and extension cords before each use.
- Take faulty equipment or plugs with bent or missing prongs out of service for repair.
- Only qualified electricians should repair electrical equipment or work on energized lines.
- If a plug doesn't have three prongs or the receptacle doesn't have three openings, make sure the tool is grounded in some other way before use.
- Never try to bypass an electrical system by cutting off the third prong of a plug.

- Turn off the power and report the smell of hot or burning plastic, smoke, sparks, or flickering lights.
- Stop using a tool or appliance if a slight shock or tingling is felt.
- Never disconnect an electrical plug by pulling on the cord.
- Whenever working on an electric circuit, the circuit should be turned off and locked out at the circuit breaker or fuse box to ensure that the circuit cannot be accidentally turned on.
- Those who regularly work on or around energized electrical equipment should be trained in emergency response and CPR.

In wet winter months, extra caution should be observed when working with electrical equipment or near grounded objects.

Insurance | Risk Management | Consulting

Gallagher provides insurance, risk management and consultation services for our clients in response to both known and unknown risk exposures. When providing analysis and recommendations regarding potential insurance coverage, potential claims and/or operational strategy in response to national emergencies (including health crises), we do so from an insurance/risk management perspective, and offer broad information about risk mitigation, loss control strategy and potential claim exposures. We have prepared this commentary and other news alerts for general informational purposes only and the material is not intended to be, nor should it be interpreted as, legal or client-specific risk management advice. General insurance descriptions contained herein do not include complete insurance policy definitions, terms and/or conditions, and should not be relied on for coverage interpretation. The information may not include current governmental or insurance developments, is provided without knowledge of the individual recipient's industry or specific business or coverage circumstances, and in no way reflects or promises to provide insurance coverage outcomes that only insurance carriers control.

Gallagher publications may contain links to non-Gallagher websites that are created and controlled by other organizations. We claim no responsibility for the content of any linked website, or any link contained therein. The inclusion of any link does not imply endorsement by Gallagher, as we have no responsibility for information referenced in material owned and controlled by other parties. Gallagher strongly encourages you to review any separate terms of use and privacy policies governing use of these third party websites and resources.
